Crew notes PRD v3

In review

Document | Roadmap | Evidence

Introduction

Shared job notes for field crews: written once on site, read the same day in the office.

Section 1

Summary

We will build Crew notes, a phone app where field crews write, photograph and voice their job notes on site, and the office reads them the same day. It serves **G-2 Fewer repeat visits**: repeat visits fall from 18% to 12% of jobs by the end of Q2 2027 Upload 5. The pilot starts on Dec 14 with two crews. We ask the leads to approve the scope of the pilot and the three decisions below.

Section 2

Goal trace

- **G-2 Fewer repeat visits** (this year): measure, repeat visits as a share of all jobs; target, from 18% to 12% by Jun 30, 2027 Upload 5. Main contribution: notes and photos reach the office the same day.
- **G-4 Office time back** (this year): measure, minutes planners spend each morning chasing notes; target, from 80 to 20 minutes Google Docs 3.
- **G-1 Customer trust** (next year): measure, jobs closed with the customer's sign-off; target, 95% of jobs. Contribution: F-6 and F-12.

Section 3

Problem

Crews finish a job and the office does not know what happened until the next morning. Notes are written on paper or in a group chat, and a third of last month's repeat visits were for jobs whose first note was lost [Slack 2]. Planners spend over an hour each morning chasing notes instead of planning [Google Docs 3].

Section 4

Features by milestone

Milestone	Feature	Goal	Outcome
Pilot with two crews	F-1 Offline job notes that sync when the crew is back in signal	G-2 Fewer repeat visits	The customer signs before the crew leaves
	F-2 Photo markup with arrows, labels and a measuring line	G-2 Fewer repeat visits	The customer signs before the crew leaves
	F-3 Shared crew roster with today's site assignments	G-2 Fewer repeat visits	The customer signs before the crew leaves
	F-5 Site checklists that carry over from the last visit	G-2 Fewer repeat visits	The customer signs before the crew leaves
	F-9 Safety walk-round with photos required before work starts	G-2 Fewer repeat visits	The customer signs before the crew leaves
Beta for all north-region crews	F-4 Voice notes turned into text with the speaker named	G-2 Fewer repeat visits	The customer signs before the crew leaves
	F-6 Customer sign-off on a phone with a typed or drawn name	G-2 Fewer repeat visits	The customer signs before the crew leaves
	F-7 Parts used on the job, picked from the van stock list	G-2 Fewer repeat visits	The customer signs before the crew leaves
	F-8 Hand-over notes between the morning and the evening crew	G-2 Fewer repeat visits	The customer signs before the crew leaves
	F-10 Office view of every open job on one map with the crew's last update	G-2 Fewer repeat visits	Notes reach the office the same day
	F-11 Search across notes, photos and voice by place, crew or part	G-2 Fewer repeat visits	Notes reach the office the same day
	F-14 Time on site recorded from arrival and departure, not typed	G-2 Fewer repeat visits	Notes reach the office the same day
General release	F-12 Job summary emailed to the customer when the job closes	G-2 Fewer repeat visits	Notes reach the office the same day
	F-13 Follow-up visits booked from the job, with the notes attached	G-2 Fewer repeat visits	Notes reach the office the same day
	F-15 Supervisor review queue for jobs flagged by the crew	G-2 Fewer repeat visits	Notes reach the office the same day
	F-16 Templates for the twelve most common job types	G-2 Fewer repeat visits	Notes reach the office the same day

Milestone	Feature	Goal	Outcome
	F-17 Export of a job's notes and photos as one printable report	G-2 Fewer repeat visits	Notes reach the office the same day
	F-18 Read-only share link for the customer's facilities manager	G-2 Fewer repeat visits	Notes reach the office the same day
	F-19 Weekly digest of repeat faults by site and by part	G-2 Fewer repeat visits	Notes reach the office the same day
	F-20 Admin settings for retention, photo quality and who sees what	G-2 Fewer repeat visits	Notes reach the office the same day

Section 5

Roadmap

- Pilot with two crews, Dec 14, 2026: two crews stop using paper
- Beta for all north-region crews, Feb 22, 2027: every north-region job has notes the same day
- General release, Apr 26, 2027: every crew and office uses Crew notes

Section 6

Non-goals

- Replacing the job booking system; Crew notes reads jobs from it and never changes them.
- Invoicing or quoting from the phone.
- Chat between crews; the group chat stays for talk, Crew notes is for the record.
- A desktop app for crews.
- Tracking where crews are during the day; only arrival and departure at a job are kept (F-14).

Section 7

Top risks

- Crews keep using the group chat: voice notes and templates make a note quicker than a chat message. See Risks and open questions.
- Offline sync loses a note: every edit is kept, never overwritten.
- Union reps object to recorded time on site: time is shown to the crew first and used for planning only.

Section 8

Decisions needed

- D1 — Pilot with the north crew and the harbour crew: owner Mara Ellison, needed by Nov 20, 2026
- D2 — Keep photos for 24 months unless a contract says otherwise: owner Priya Nandakumar, needed by Dec 1, 2026
- D3 — Ship voice notes in the beta, not the pilot: owner Jonah Pike, needed by Dec 1, 2026

FULL VERSION

Section 9

Problem alignment

Who has the problem, why it matters now, and how we will know it is solved.

9.1 *Who has it*

1. **Crew leads** (about 140): write the job note today on paper; want to leave the site without a call from the office.
2. **Crew members** (about 380): take photos on their own phones and send them to the group chat.
3. **Office planners** (12): read every note each morning and book follow-up visits.
4. **Supervisors** (9): review jobs with problems and coach crews.
5. **Customers' facilities managers**: ask for a record of each visit, today sent by email a week later.

9.2 *Why now*

Repeat visits rose from 15.9% to 18.4% of jobs between Q2 and Q3 Upload 5. Two large customers renew their contracts in spring and both asked for a visit record within a day. The crews' phones were replaced in September, so every crew now has a phone that can run the app Meeting notes 1.

9.3 *Success measures*

Measure	Today	Pilot target	General release target	Source
Repeat visits, share of jobs	18.4%	16%	12%	Job system
Jobs with a note the same day	41%	90%	95%	Crew notes
Planner minutes chasing notes, each morning	80	45	20	Survey
Jobs closed with customer sign-off	62%	80%	95%	Crew notes

Section 10

Solution alignment

What we will build, in what order, and the rules it follows.

10.1 *Approach*

Start with the note the crew already writes, and make it quicker than paper. Every other feature hangs off the job note: photos, voice, parts, sign-off, hand-over. The office sees the same note on a map the moment it syncs.

We build for no signal first. A crew in a basement plant room must be able to finish the job and close it, and the note syncs when the van is back on the road Meeting notes 1.

10.2 *Prioritized features*

1. F-1 Offline job notes that sync when the crew is back in signal
2. F-2 Photo markup with arrows, labels and a measuring line
3. F-3 Shared crew roster with today's site assignments
4. F-4 Voice notes turned into text with the speaker named
5. F-5 Site checklists that carry over from the last visit
6. F-6 Customer sign-off on a phone with a typed or drawn name
7. F-7 Parts used on the job, picked from the van stock list
8. F-8 Hand-over notes between the morning and the evening crew
9. F-9 Safety walk-round with photos required before work starts
10. F-10 Office view of every open job on one map with the crew's last update
11. F-11 Search across notes, photos and voice by place, crew or part
12. F-12 Job summary emailed to the customer when the job closes
13. F-13 Follow-up visits booked from the job, with the notes attached
14. F-14 Time on site recorded from arrival and departure, not typed
15. F-15 Supervisor review queue for jobs flagged by the crew
16. F-16 Templates for the twelve most common job types

17. F-17 Export of a job's notes and photos as one printable report
18. F-18 Read-only share link for the customer's facilities manager
19. F-19 Weekly digest of repeat faults by site and by part
20. F-20 Admin settings for retention, photo quality and who sees what

10.3 *Key flows*

1. The crew lead opens today's jobs; the first job is at the top.
2. On arrival the time on site starts (F-14) and the safety walk-round opens (F-9).
3. The crew writes or speaks the note, adds photos and marks them up (F-2, F-4).
4. Parts used are picked from the van stock (F-7).
5. The customer signs on the phone (F-6).
6. The job closes; the summary goes to the customer (F-12) and the office sees it on the map (F-10).
7. If a follow-up is needed, the crew books it from the job (F-13).

10.4 *Requirements*

- R61 (F-1) A crew can write, edit and close a job with no signal for a full ten-hour shift.
- R62 (F-2) A photo can be marked up with arrows, labels and a measuring line, and the original is kept.
- R63 (F-6) A job cannot close without either a signature or a reason for none.
- R64 (F-9) Work cannot be marked started until the walk-round has its required photos.
- R65 (F-14) Time on site is taken from arrival and departure at the job's address; the crew can correct it with a reason.
- R66 (F-20) An admin sets photo retention per customer, from 12 to 60 months.
- R67 (F-10) The office map shows each open job's last note time, to the minute.
- R68 (F-17) A job's report prints on Letter paper with every photo and its markup.

10.5 *Rules and edge cases*

- Two crew members edit the same note offline: both edits are kept and shown side by side; nothing is overwritten.

- A job is cancelled while the crew is on site: the note stays and is marked cancelled.
- A photo shows a person's face: it is kept but blurred in the customer's report.
- The phone's clock is wrong: times are taken from the sync server when the phone reconnects.
- A crew member leaves the company: their notes stay, under their name.

Section 11

Feature detail

One section per feature, in priority order.

11.1 *F-1 Offline job notes that sync when the crew is back in signal*

Owner: Lena Okafor · **Milestone:** Pilot with two crews · **Goal:** G-2 Fewer repeat visits

Offline job notes that sync when the crew is back in signal is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Meeting notes 1.

User stories:

- As a crew lead, I want offline job notes that sync when the crew is back in signal so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R1 (F-1) Works with no signal for a full shift and keeps every change made offline.
- R2 (F-1) Shows who wrote each note and when, in the crew's own time zone.
- R3 (F-1) Opens in under two seconds on the oldest phone the crews use.

Depends on F-4. Acceptance is checked on the pilot crews' phones.

11.2 *F-2 Photo markup with arrows, labels and a measuring line*

Owner: Tomas Reyes · **Milestone:** Pilot with two crews · **Goal:** G-2 Fewer repeat visits

Photo markup with arrows, labels and a measuring line is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office re-types it the next morning Slack 2.

User stories:

- As a crew lead, I want photo markup with arrows, labels and a measuring line so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R4 (F-2) Works with no signal for a full shift and keeps every change made offline.
- R5 (F-2) Shows who wrote each note and when, in the crew's own time zone.
- R6 (F-2) Opens in under two seconds on the oldest phone the crews use.

Depends on F-3 and on the van stock list from the parts team. Acceptance is checked on the pilot crews' phones, not in the office.

11.3 *F-3 Shared crew roster with today's site assignments*

Owner: Mara Ellison · **Milestone:** Pilot with two crews · **Goal:** G-2 Fewer repeat visits

Shared crew roster with today's site assignments is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Google Docs 3.

User stories:

- As a crew lead, I want shared crew roster with today's site assignments so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R7 (F-3) Works with no signal for a full shift and keeps every change made offline.

- R8 (F-3) Shows who wrote each note and when, in the crew's own time zone.
- R9 (F-3) Opens in under two seconds on the oldest phone the crews use.

Depends on F-6. Acceptance is checked on the pilot crews' phones.

11.4 *F-4 Voice notes turned into text with the speaker named*

Owner: Jonah Pike · **Milestone:** Beta for all north-region crews · **Goal:** G-2 Fewer repeat visits

Voice notes turned into text with the speaker named is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office re-types it the next morning Notion 4.

User stories:

- As a crew lead, I want voice notes turned into text with the speaker named so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R10 (F-4) Works with no signal for a full shift and keeps every change made offline.
- R11 (F-4) Shows who wrote each note and when, in the crew's own time zone.
- R12 (F-4) Opens in under two seconds on the oldest phone the crews use.

Depends on F-7. Acceptance is checked on the pilot crews' phones.

11.5 *F-5 Site checklists that carry over from the last visit*

Owner: Lena Okafor · **Milestone:** Pilot with two crews · **Goal:** G-2 Fewer repeat visits

Site checklists that carry over from the last visit is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Upload 5.

User stories:

- As a crew lead, I want site checklists that carry over from the last visit so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R13 (F-5) Works with no signal for a full shift and keeps every change made offline.
- R14 (F-5) Shows who wrote each note and when, in the crew's own time zone.
- R15 (F-5) Opens in under two seconds on the oldest phone the crews use.

Depends on F-8. Acceptance is checked on the pilot crews' phones.

11.6 *F-6 Customer sign-off on a phone with a typed or drawn name*

Owner: Priya Nandakumar · **Milestone:** Beta for all north-region crews · **Goal:** G-2 Fewer repeat visits

Customer sign-off on a phone with a typed or drawn name is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Meeting notes 6.

User stories:

- As a crew lead, I want customer sign-off on a phone with a typed or drawn name so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R16 (F-6) Works with no signal for a full shift and keeps every change made offline.

- R17 (F-6) Shows who wrote each note and when, in the crew's own time zone.
- R18 (F-6) Opens in under two seconds on the oldest phone the crews use.

Depends on F-7 and on the van stock list from the parts team. Acceptance is checked on the pilot crews' phones, not in the office.

11.7 *F-7 Parts used on the job, picked from the van stock list*

Owner: Tomas Reyes · **Milestone:** Beta for all north-region crews · **Goal:** G-2 Fewer repeat visits

Parts used on the job, picked from the van stock list is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Meeting notes 1.

User stories:

- As a crew lead, I want parts used on the job, picked from the van stock list so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R19 (F-7) Works with no signal for a full shift and keeps every change made offline.
- R20 (F-7) Shows who wrote each note and when, in the crew's own time zone.
- R21 (F-7) Opens in under two seconds on the oldest phone the crews use.

Depends on F-10. Acceptance is checked on the pilot crews' phones.

11.8 *F-8 Hand-over notes between the morning and the evening crew*

Owner: Mara Ellison · **Milestone:** Beta for all north-region crews · **Goal:** G-2 Fewer repeat visits

Hand-over notes between the morning and the evening crew is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Slack 2.

User stories:

- As a crew lead, I want hand-over notes between the morning and the evening crew so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R22 (F-8) Works with no signal for a full shift and keeps every change made offline.
- R23 (F-8) Shows who wrote each note and when, in the crew's own time zone.
- R24 (F-8) Opens in under two seconds on the oldest phone the crews use.

Depends on F-11. Acceptance is checked on the pilot crews' phones.

11.9 *F-9 Safety walk-round with photos required before work starts*

Owner: Jonah Pike · **Milestone:** Pilot with two crews · **Goal:** G-2 Fewer repeat visits

Safety walk-round with photos required before work starts is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Google Docs 3.

User stories:

- As a crew lead, I want safety walk-round with photos required before work starts so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R25 (F-9) Works with no signal for a full shift and keeps every change made offline.
- R26 (F-9) Shows who wrote each note and when, in the crew's own time zone.
- R27 (F-9) Opens in under two seconds on the oldest phone the crews use.

Depends on F-12. Acceptance is checked on the pilot crews' phones.

11.10 *F-10 Office view of every open job on one map with the crew's last update*

Owner: Priya Nandakumar · **Milestone:** Beta for all north-region crews · **Goal:** G-2 Fewer repeat visits

Office view of every open job on one map with the crew's last update is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Notion 4.

User stories:

- As a crew lead, I want office view of every open job on one map with the crew's last update so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R28 (F-10) Works with no signal for a full shift and keeps every change made offline.
- R29 (F-10) Shows who wrote each note and when, in the crew's own time zone.
- R30 (F-10) Opens in under two seconds on the oldest phone the crews use.

Depends on F-11 and on the van stock list from the parts team. Acceptance is checked on the pilot crews' phones, not in the office.

11.11 *F-11 Search across notes, photos and voice by place, crew or part*

Owner: Lena Okafor · **Milestone:** Beta for all north-region crews · **Goal:** G-2 Fewer repeat visits

Search across notes, photos and voice by place, crew or part is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Upload 5.

User stories:

- As a crew lead, I want search across notes, photos and voice by place, crew or part so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R31 (F-11) Works with no signal for a full shift and keeps every change made offline.
- R32 (F-11) Shows who wrote each note and when, in the crew's own time zone.
- R33 (F-11) Opens in under two seconds on the oldest phone the crews use.

Depends on F-14. Acceptance is checked on the pilot crews' phones.

11.12 *F-12 Job summary emailed to the customer when the job closes*

Owner: Mara Ellison · **Milestone:** General release · **Goal:** G-2 Fewer repeat visits

Job summary emailed to the customer when the job closes is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Meeting notes 6.

User stories:

- As a crew lead, I want job summary emailed to the customer when the job closes so that the office knows what happened without calling me.

- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R34 (F-12) Works with no signal for a full shift and keeps every change made offline.
- R35 (F-12) Shows who wrote each note and when, in the crew's own time zone.
- R36 (F-12) Opens in under two seconds on the oldest phone the crews use.

Depends on F-15. Acceptance is checked on the pilot crews' phones.

11.13 *F-13 Follow-up visits booked from the job, with the notes attached*

Owner: Tomas Reyes · **Milestone:** General release · **Goal:** G-2 Fewer repeat visits

Follow-up visits booked from the job, with the notes attached is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Meeting notes 1.

User stories:

- As a crew lead, I want follow-up visits booked from the job, with the notes attached so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R37 (F-13) Works with no signal for a full shift and keeps every change made offline.
- R38 (F-13) Shows who wrote each note and when, in the crew's own time zone.
- R39 (F-13) Opens in under two seconds on the oldest phone the crews use.

Depends on F-16. Acceptance is checked on the pilot crews' phones.

11.14 *F-14 Time on site recorded from arrival and departure, not typed*

Owner: Jonah Pike · **Milestone:** Beta for all north-region crews · **Goal:** G-2 Fewer repeat visits

Time on site recorded from arrival and departure, not typed is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Slack 2.

User stories:

- As a crew lead, I want time on site recorded from arrival and departure, not typed so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R40 (F-14) Works with no signal for a full shift and keeps every change made offline.
- R41 (F-14) Shows who wrote each note and when, in the crew's own time zone.
- R42 (F-14) Opens in under two seconds on the oldest phone the crews use.

Depends on F-15 and on the van stock list from the parts team. Acceptance is checked on the pilot crews' phones, not in the office.

11.15 *F-15 Supervisor review queue for jobs flagged by the crew*

Owner: Priya Nandakumar · **Milestone:** General release · **Goal:** G-2 Fewer repeat visits

Supervisor review queue for jobs flagged by the crew is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office re-types it the next morning Google Docs 3.

User stories:

- As a crew lead, I want supervisor review queue for jobs flagged by the crew so that the office knows what happened without calling me.

- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R43 (F-15) Works with no signal for a full shift and keeps every change made offline.
- R44 (F-15) Shows who wrote each note and when, in the crew's own time zone.
- R45 (F-15) Opens in under two seconds on the oldest phone the crews use.

Depends on F-18. Acceptance is checked on the pilot crews' phones.

11.16 *F-16 Templates for the twelve most common job types*

Owner: Lena Okafor · **Milestone:** General release · **Goal:** G-2 Fewer repeat visits

Templates for the twelve most common job types is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office re-types it the next morning Notion 4.

User stories:

- As a crew lead, I want templates for the twelve most common job types so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R46 (F-16) Works with no signal for a full shift and keeps every change made offline.
- R47 (F-16) Shows who wrote each note and when, in the crew's own time zone.
- R48 (F-16) Opens in under two seconds on the oldest phone the crews use.

Depends on F-19. Acceptance is checked on the pilot crews' phones.

11.17 *F-17 Export of a job's notes and photos as one printable report*

Owner: Mara Ellison · **Milestone:** General release · **Goal:** G-2 Fewer repeat visits

Export of a job's notes and photos as one printable report is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Upload 5.

User stories:

- As a crew lead, I want export of a job's notes and photos as one printable report so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R49 (F-17) Works with no signal for a full shift and keeps every change made offline.
- R50 (F-17) Shows who wrote each note and when, in the crew's own time zone.
- R51 (F-17) Opens in under two seconds on the oldest phone the crews use.

Depends on F-20. Acceptance is checked on the pilot crews' phones.

11.18 *F-18 Read-only share link for the customer's facilities manager*

Owner: Tomas Reyes · **Milestone:** General release · **Goal:** G-2 Fewer repeat visits

Read-only share link for the customer's facilities manager is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Meeting notes 6.

User stories:

- As a crew lead, I want read-only share link for the customer's facilities manager so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.

- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R52 (F-18) Works with no signal for a full shift and keeps every change made offline.
- R53 (F-18) Shows who wrote each note and when, in the crew's own time zone.
- R54 (F-18) Opens in under two seconds on the oldest phone the crews use.

Depends on F-19 and on the van stock list from the parts team. Acceptance is checked on the pilot crews' phones, not in the office.

11.19 *F-19 Weekly digest of repeat faults by site and by part*

Owner: Jonah Pike · **Milestone:** General release · **Goal:** G-2 Fewer repeat visits

Weekly digest of repeat faults by site and by part is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Meeting notes 1.

User stories:

- As a crew lead, I want weekly digest of repeat faults by site and by part so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R55 (F-19) Works with no signal for a full shift and keeps every change made offline.
- R56 (F-19) Shows who wrote each note and when, in the crew's own time zone.
- R57 (F-19) Opens in under two seconds on the oldest phone the crews use.

Depends on F-2. Acceptance is checked on the pilot crews' phones.

11.20 *F-20 Admin settings for retention, photo quality and who sees what*

Owner: Priya Nandakumar · **Milestone:** General release · **Goal:** G-2 Fewer repeat visits

Admin settings for retention, photo quality and who sees what is for the crew on site and the office that plans their next day. Today the crew writes this on paper or in a group chat, and the office retypes it the next morning Slack 2.

User stories:

- As a crew lead, I want admin settings for retention, photo quality and who sees what so that the office knows what happened without calling me.
- As an office planner, I want the job's notes in one place so that I can book the follow-up visit before the crew leaves the area.
- As a supervisor, I want to see which jobs had problems so that I can coach the crew that week.

Requirements:

- R58 (F-20) Works with no signal for a full shift and keeps every change made offline.
- R59 (F-20) Shows who wrote each note and when, in the crew's own time zone.
- R60 (F-20) Opens in under two seconds on the oldest phone the crews use.

Depends on F-3. Acceptance is checked on the pilot crews' phones.

Section 12

Risks and open questions

ID	Risk	Likelihood	Impact	Owner	Mitigation	Trigger to act	Review by
K1	Crews keep using the group chat because it is faster to type in	High	High	Mara Ellison	Voice notes (F-4) and job templates (F-16) make the first note quicker than a chat message	Fewer than half the pilot jobs have a note by noon	Dec 21, 2026
K2	Photos fill the phones of crews on older handsets	Medium	High	Tomas Reyes	Upload on Wi-Fi, keep a small copy on the phone, settings in F-20	Any pilot phone under 1 GB free	Dec 7, 2026
K3	Offline sync loses a note when two people edit the same job	Medium	High	Lena Okafor	Every edit is kept; the second one is shown beside the first, never overwritten	One lost note reported in the pilot	Jan 11, 2027
K4	Customers refuse to sign on a crew member's phone	Low	Medium	Priya Nandakumar	Typed name accepted; sign-off can be sent as a link (F-18)	Over 10% of jobs closed without sign-off	Mar 1, 2027
K5	The parts team's stock list is not ready for the beta	Medium	Medium	Tomas Reyes	Beta ships with free-text parts; the list joins when ready	Stock list not live by Jan 25, 2027	Jan 25, 2027
K6	Voice-to-text gets site names and part numbers wrong	High	Medium	Jonah Pike	The crew checks the text before it is saved; a word list per region	Over 1 in 5 voice notes corrected	Feb 8, 2027
K7	Office planners do not trust the map's last-update times	Medium	Medium	Priya Nandakumar	Show the time of the last note, not of the last app open	Planners still phone crews for status	Mar 15, 2027
K8	Retention rules differ by customer contract	Low	High	Priya Nandakumar	Retention per customer in F-20, default 24 months	A contract asks for less than 12 months	Apr 5, 2027

ID	Risk	Likelihood	Impact	Owner	Mitigation	Trigger to act	Review by
K9	Union reps object to recorded time on site	Medium	High	Jonah Pike	Time is shown to the crew first and used for planning only	A formal objection is raised	Jan 18, 2027
K10	The pilot crews are not typical of the region	Medium	Low	Mara Ellison	Pick one fast and one slow crew; compare with two crews not in the pilot	Pilot numbers differ by more than 30%	Dec 21, 2026

Open questions:

- Q1: Do supervisors see time on site per person or only per crew? Owner Jonah Pike, by Dec 7, 2026.
- Q2: Can a customer's facilities manager comment on a shared job, or only read it? Owner Tomas Reyes, by Jan 18, 2027.
- Q3: Which job types get templates first? Owner Lena Okafor, by Dec 14, 2026.
- Q4: Does the parts team want parts used sent back to their stock system in the beta? Owner Tomas Reyes, by Jan 11, 2027.

Section 13

Milestones

Milestone	Date	Features	Exit criteria	Date source
Pilot with two crews	Dec 14, 2026	F-1, F-2, F-3, F-5, F-9	Two crews, four weeks, no paper notes	Tracker estimate
Beta for all north-region crews	Feb 22, 2027	F-4, F-6, F-7, F-8, F-10, F-11, F-14	90% of north-region jobs have a note the same day	Tracker estimate
General release	Apr 26, 2027	F-12, F-13, F-15, F-16, F-17, F-18, F-19, F-20	All crews; repeat visits under 14%	Tracker estimate

13.1 *Pilot with two crews*

Date: Dec 14, 2026 (tracker estimate)

Scope: F-1, F-2, F-3, F-5, F-9.

Exit criteria:

- Crews in this stage write no paper notes for four weeks.
- Planners read every note by 9 AM the next day.
- No note is lost in sync.

13.2 *Beta for all north-region crews*

Date: Feb 22, 2027 (tracker estimate)

Scope: F-4, F-6, F-7, F-8, F-10, F-11, F-14.

Exit criteria:

- Crews in this stage write no paper notes for four weeks.
- Planners read every note by 9 AM the next day.
- No note is lost in sync.

13.3 *General release*

Date: Apr 26, 2027 (tracker estimate)

Scope: F-12, F-13, F-15, F-16, F-17, F-18, F-19, F-20.

Exit criteria:

- Crews in this stage write no paper notes for four weeks.
- Planners read every note by 9 AM the next day.
- No note is lost in sync.

Section 14

Launch

1. **Internal** (Dec 1, 2026): the product team and two supervisors use it on real jobs for a week.
2. **Pilot** (Dec 14, 2026): the north crew and the harbour crew; daily check-in with Mara Ellison.
3. **Beta** (Feb 22, 2027): every north-region crew; support answers within the shift.
4. **General** (Apr 26, 2027): every crew; the paper job sheet is withdrawn a month later.

Teams that must be ready: support (a one-page guide for crews), office planning (a morning routine without phone calls), the parts team (stock list), and data (the repeat-visit report).

Section 15

Post-launch recap

Filled after the general release.

Section 16

Sources and data points

Every source and number this PRD uses.

16.1 *Sources*

- c1, fireflies: Ride-along with the north crew (transcript), read Oct 28, 2026
- c2, slack: #field-ops thread on repeat visits, read Oct 29, 2026
- c3, gdocs: Office planning survey, October, read Oct 30, 2026
